

Municipal Street Lighting Program

As a Joint Powers Authority, ICFA provides local governments with bond financing for important municipal projects. In partnership with experienced energy solution providers, ICFA has created the Municipal Street Lighting Program to help cities save money by taking control of their utilities.

Dramatically reduce the cost of street lights in your city by purchasing the lights and retrofitting them with LED technology.

Program Features

- No out-of-pocket expense
- Ten-year guarantee on new lights
- Increased eligibility for federal rebates
- Better nighttime visibility for residents
- Significantly reduced maintenance costs

PO Box 6740
Lancaster, CA 93539-6740

Taking ownership of their streetlights allows cities to install highly efficient LED lights. Costs per kilowatt hour are reduced, maintenance fees go down, and nighttime visibility is markedly improved.

With ICFA bond financing and comprehensive warranties on new lights, the Municipal Street Lighting Program offers cities a way to improve how their utilities are run without adding a penny to their budget.
